GitHub: github.com/prateek2413

Email: prateekbishnoi24@gmail.com

Mobile: +91-9897703680

SKILLS

Languages: Java, Python, C++, SQL
Tools/Platforms: GitHub, Git, Jupyter, Jira, Visual Studio Code, Google Colab, Power BI, Excel, Tableau
Soft Skills: Problem-Solving, Time Management, Multitasking, Self-Learning.

PROJECTS

Smart File Management System | [GitHub](#) Jul' 2026

- Engineered a C++ console-based file management system for organizing, managing, and accessing files efficiently using unique file IDs and structured folder-based organization.
- Implemented functionalities to add, delete, search, display, and sort files by name and size.
- Designed a folder hierarchy supporting folders and nested subfolders for structured file organization.
- Implemented file-to-folder association using file IDs, avoiding duplicate storage of file objects.
- Added recently accessed file tracking and automatic save/load functionality for persistent data management.
- Tech used - C++, OOP, Data Structures & Algorithms, STL, File Handling

Air Pollution Analysis Dashboard | [GitHub](#) Apr' 2026

- Built an interactive air pollution dashboard using Python to analyze patterns across cities and states.
- Performed data cleaning and EDA using Pandas and NumPy on government-sourced pollution data.
- Built interactive state, pollutant, threshold, and Top-N city filters using Panel.
- Developed KPI metrics to compare average and maximum pollution levels across monitoring locations.
- Developed bar charts, scatter plots, and category distributions to identify highly polluted regions.
- Tech used – Python, Pandas, NumPy, Panel, Matplotlib, Seaborn

Air Quality Analysis & Visualization | [Power BI](#) | [GitHub](#) Mar' 2025

- Designed an interactive Power BI dashboard using government-sourced air quality data to analyze pollution trends, pollutant levels, and regional variations across different cities and regions.
- Analysed major pollutants and their contribution to overall pollution levels using interactive visualizations.
- Created interactive maps, KPI cards, and analytical charts to present key air quality insights, compare pollution levels, and identify highly polluted locations across different regions. Enabled location-wise comparison of air quality metrics across cities and regions for better data-driven analysis.
- Implemented interactive filters and visual drill-downs to explore pollution data and generate actionable insights.
- Tech used - Power BI, Data Analytics, Data Visualization

TRAINING

Deloitte- Data Analytics Job Simulation | [Forage](#) Jun' 2026

Virtual Job Simulation

- Earned hands-on experience through a Deloitte job simulation in data analysis and forensic technology.
- Designed a Tableau dashboard to analyse data and communicate key insights.
- Applied Excel-based data classification to support business analysis and conclusions.

Master Data Structures & Algorithms | [Lovely Professional University](#) Jul' 2026

- Completed an intensive Data Structures & Algorithms skill development course focused on building, optimizing, and solving programming problems using fundamental data structures and algorithms.
- Strengthened algorithmic problem-solving and optimization skills through practical training.
- Achieved an A grade upon completion of the course, demonstrating proficiency in Data Structures & Algorithms.

CERTIFICATIONS

- | | |
|---|-----------|
| Database Management System Part - 1 Infosys | Aug' 2026 |
| Programming Using C++ Infosys | Aug' 2025 |
| Introduction to AI & ML Skillera | Mar' 2025 |
| Linux Commands and Shell Scripting Skillera | Nov' 2024 |

EDUCATION

Lovely Professional University	Phagwara, Punjab
Bachelor of Technology - Computer Science and Engineering; CGPA: 8.54	Aug' 2024 – Present

Spring Dales Public School	Meerut, Uttar Pradesh
Intermediate; Percentage: 85%	Apr' 2023 – May' 2024

Vidya Deep Global School	Meerut, Uttar Pradesh
Matriculation; Percentage: 86%	Apr' 2021 – May' 2022
